

## CONGRATULATIONS!

You are now a proud owner of an innovative Saxophone. Your Vibrato Saxophone will provide you with many years of enjoyment if it's been taken care properly.

## MAINTENANCE AND CARE

Like all saxophones, your Vibrato is a high precision musical instrument and should be treated with care. Please take a precaution on all keys when you grab the instrument or when you put it down. make sure that you have the key-guards facing down. It's always best to put your Vibrato back in it's box after use. The saxophone cases on the market can not be use due to the different in body thickness. Do not use any solvent on your Vibrato use only dampened clean cloth to clean it. Assemble the neck by putting your right hand in playing position then with your left hand twist it gently never use an excessive force on the post while installing the neck. Please keep the A1 in cool&dry place for storage, excessive heat can deform it's shape and damage the silicone pad.
